Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 1-20 are pending are in this application.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. Claims 1-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 6,528,076 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patent and instant application are directed towards a topical composition for the treatment of pain. The common features of the patent and instant application is a composition containing a salicylate-based compound and acetone. The differences is that the composition of the patent further contains the addition of an emollient and menthol in claim 1, whereas it is not contained in claim one of the instant application. However, the limitations of the menthol and emollient is

disclosed in claim 4 and 6 respectively in the instant application, thus making the instant invention obvious over the patent.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3, 13-15, 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yu et al. (US 4,216,224).

Yu et al. discloses in example 11 (col. 6, lines 15-22) a method of preparing a 0.5% methyl retinoyl salicylate cream. The method comprises dissolving 0.5 gm of methyl retinoyl salicylate with 5 ml of acetone and mixing the solution with 95 gm of hydrophilic ointment to get a uniform consistency. The prior art does not disclose the claimed concentration of the salicylate-based compound and the acetone.

With respect to the claimed concentrations, absent a clear showing of criticality, the determination of particular concentrations is within the skill of the ordinary worker as part of the process of normal optimization of the claimed composition. It is the position of the examiner that while the composition of the prior art is being used to treat psoriasis, and since the claims of the instant application are directed towards a composition not a method, then the composition of the prior art can be used in the

Art Unit: 1616

instant application since both compositions contain a salicylate-based compound and the acetone.

Conclusion

3. Claims 1-20 are rejected.
